

Appendix 5

PCMH Distinction in Electronic Quality Measure (eCQM) Reporting

Launching on Q-PASS in 2019

Distinction Purpose and Background

Health care continues to move toward a performance-based evaluation of practices, with an ever-increasing emphasis on quality measurement and quality improvement. NCQA supports this movement and has curated 35 electronic clinical quality measures (eCQM) that help primary care practices measure and improve care in key areas. By directly extracting data from EHRs, eCQMs reduce the time, expense and clinical burden that comes from manual data abstraction. Measures can be submitted through EHRs, health information exchanges, qualified clinical data registries and data analytics companies as long as they can use the electronic specifications as defined by CMS for the ambulatory quality reporting programs. Using eCQMs can also help practices earn and sustain NCQA PCMH Recognition, as there are specific criteria within the standards where performance measures may be used as evidence of meeting the criteria.

Eligibility

Practices with current NCQA PCMH Recognition are eligible for the optional distinction. Practices may pursue NCQA PCMH Recognition and Distinction in Electronic Quality Measures Reporting at the same time.

Requirements Description

Practices must submit approved measures in standard QRDA III format. For each clinician in the practice, PCMH practice sites submit at least 6 measures from the list of 35 measures listed in the table in this appendix. If practices submit fewer than 6 measures per clinician, the measures can be used as evidence to meet specific criteria in PCMH, but they will not earn distinction.

Measures cover a range of categories: Acute Care, Behavioral Health/Chronic Disease Care, Overuse, Immunization, Preventive Care, Administrative. Practices interested in submitting eCQMs can either:

- Use an NCQA Certified Vendor to create the appropriate QRDA III files, then:
 - The vendor uploads files on behalf of the practice through an application program interface (API) provided by NCQA (Q-Bridge).
 - The vendor provides QRDA III files to the practice and the practice uploads the files through Q-PASS, **or**
- Have and use Meaningful Use Certified Electronic Health Record Technology (CEHRT) or a data intermediary with the capability to produce CMS QRDA III files, then:
 - The practice uploads QRDA III files through Q-PASS.

Specifications

QRDA Category III files must conform to current eCQM specifications used for the Medicare and Medicaid EHR Incentive Programs (the “Meaningful Use” program) and the Quality Payment Program (QPP). Some vendors/data intermediaries may also build reports for other quality programs (e.g., the Physician Quality Reporting Program); these reports should not be used for this program.

Organizations that participated in the Medicare or Medicaid EHR Incentive Program in 2017 or the QPP in 2018 may choose to submit to NCQA their most recent QRDA III files that were submitted to CMS as part of either program.

The current eCQM measure specifications are found in the CMS eCQM library:

https://www.cms.gov/Regulations-and-Guidance/Legislation/EHRIncentivePrograms/eCQM_Library.html.

The CMS eCQM Library contains a number of other useful resources, including QRDA Implementation Guides and a link to the CMS helpdesk for questions regarding eCQM specifications, logic and QRDA reporting.

Reporting Period

NCQA will accept data from a 365-day reporting period or a 90-day period in the year prior to reporting to NCQA.

If an organization chooses to report for a 90-day period, it must provide a rationale for not reporting a full year's data (i.e., alignment with the Merit-based Incentive Payment System [MIPS]) and state whether the 90-day period was applied to the measure denominator, to the numerator and exclusions or only to the measure denominator.

Receiving Distinction/Scoring

Distinction will be awarded for one year to PCMH practice sites that submit at least 6 measures from our list of 35 for each clinician in the practice. This approach is consistent with MIPS reporting requirements.

Quality Measures Crosswalk for PCMH 2017[^]

KEY TO TABLE SYMBOLS

- [^] NCQA intends to accept the results of these measures for the 2017 PCMH program. The specifications for these measures are available through CMS eCQM Library at: https://www.cms.gov/regulations-and-guidance/legislation/ehrincentiveprograms/ecqm_library.html
-  Measure included in Quality Payment Program Merit-based Incentive Payment System (MIPS).
-  HEDIS and Medicare Star measure specifications differ from CMS eCQM specifications.
-  HEDIS Measure included here though HEDIS specification is different than CMS eCQM specification and data collection methodology is via Electronic Clinical Data Systems Reporting ([ECDS](#)).
-  Medicare Stars measures: A version of this measure is included in the Medicare Stars program though the specifications and method of collection differ from the CMS eCQM version used for the PCMH 2017 program.

Measure Title	NQF # (CMS eCQM #)	Population	NCQA eMeasure Certification	CMS/AHIP Consensus Core Set ACO & PCMH	CPC+	HEDIS Plan Level & Medicare Star Rating System	NCQA PCMH 2017 Recognition Credit	Owner (Developer)
ACUTE CARE								
Appropriate Treatment for Children with Upper Respiratory Infection 	69 (154)	Pediatric	✓			✓	QI 01C	NCQA ¹
